The sequence contained an oligo-dr track that was present in the
oligonuclectide that was used to prime the synthesis of first
strand cDNA and therefore this may represent a bonafide poly A
tail. cDNA library Preparation: M.B. Soares Lab Clone distribution:

This clone is available from RZPD,
Contact RZPD (customer.service@rzbd.de) for further information.
This cDS clone is part of a collection of human full ORP clones
jointly established and verified by the Harvard Institute of
Proteomics (HIP) and RZPD.
This CDS has been cloned without stopcodon.
The CDS has been inserted into pDONR201 via a BP Clonase(TM)
reaction. Additional sequence has been added in front of the start
codon: att. AAAAAA GCA GGC TCC ACC (ARG).
The last codon is followed by the 3' att site: GACCCAGCTTTCT. att
The clone is validated by full sequence check.
Compared to the reference sequence NM 003874 (GI:4502686) we found
AAA exchange(s) at position (first base of changed triplet):
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        /processin_id="CAG46645.1"
